EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 26, line 1, insert "(currently amended)".

Allowable Subject Matter

Claims 1-32 are allowable of the prior art of record, because the combination of a flame retardant, anode passivation additive and gas suppression additive provides results which are significantly superior to results of the individual components and would not be obvious to one of ordinary skill in the art. The results in Table 1 show that the three materials together results in a cell volume change after overcharge of only 2.9% for the three additives compared to 19% for the anode passivation additive alone and 16% for the flam retardant alone. Therefore, the instant claims are allowable over the rejections of record.
